

Momentum Grid[®] Report for Distribution ERP | Winter 2024

Trending Distribution ERP Software

Momentum scores for Distribution ERP are shown below. The Momentum Grid[®] highlights each product's Momentum score on the vertical axis and the product's Satisfaction score on the horizontal axis. These scores are based on G2's Satisfaction and Momentum algorithms. Products with a top 25% Momentum Grid[®] score are shown within the shaded area below.

G2 Momentum Grid[®] Scoring

(Trending Distribution ERP Software continues on next page)

Trending Distribution ERP Software (continued)

Distribution ERP Momentum Grid® Description

A product's Momentum score is calculated by a proprietary algorithm that factors in social, web, employee, and review data that G2 has deemed influential in a company's momentum. Software buyers can compare products in the Distribution ERP category according to their Momentum and Satisfaction scores to streamline the buying process and quickly identify trending products. For sellers, media, investors, and analysts, the Momentum Grid® provides benchmarks for product comparison and market trend analysis. Badges are awarded to products with the top Momentum Grid® scores.

Products included in the Momentum Grid® for Distribution ERP have received a minimum of 10 reviews. There must also be at least a year of G2 data for the product to be included. These ratings may change as the products are further developed, the sellers grow, and additional opinions are shared by users; a new Momentum Grid® report will be issued for this category as significant data is collected.

Distribution ERP Software Definition

Distribution ERP software manages logistics operations as well as front- and back-office activities of wholesale and distribution companies. This type of software is used to determine product demand and ensure that products sold are delivered on time. Distribution ERP is used mostly by departments in charge of inventory, warehousing, and logistics. Since distributors sometimes combine products before selling them, most distribution ERP software offer features for assembly and kitting. Most distribution ERP solutions also provide modules for accounting, sales, and purchasing, and sometimes human resources.

Since not all distribution ERP products include all the modules mentioned above, they usually integrate with [accounting software](#), [CRM all-in-one software](#), or [HR management suites](#). For advanced supply chain management and e-commerce needs, distribution ERP systems also integrate with [supply chain suites](#) and [e-commerce platforms](#).

To qualify for inclusion in the Distribution ERP category, a product must:

- ▶ Provide inventory management and control functionality
- ▶ Generate inventory count documents for cycle counts
- ▶ Include features to manage warehouses across multiple locations
- ▶ Track sales orders and match them to inventory availability
- ▶ Create and manage purchase orders to fulfill demand
- ▶ Manage shipping and receiving operations in various locations
- ▶ Assist users with picking and packing products for shipping
- ▶ Maintain financial transactions for all activities such as sales or purchases
- ▶ Manage product cost, pricing, discounts, and profit margins
- ▶ Plan and implement transportation and delivery schedules
- ▶ Analyze the financial and operational performance of the company

Momentum Scores for Distribution ERP

The table below shows the Momentum, Satisfaction, and Momentum Grid® scores that determine seller placement on the Momentum Grid®.

Momentum Leaders

	Momentum Score	Satisfaction Score	Momentum Grid® Score
Acumatica	74	89	80
Epicor Eclipse	63	79	70

Momentum Grid® Methodology

G2 rates products based on reviews gathered from our user community, as well as data aggregated from online sources and social networks. The Momentum Grid® for Distribution ERP is based on scores calculated using the G2 Satisfaction algorithm v3.0 and the G2 Momentum algorithm v1.0 from reviews collected through November 21, 2023.

Satisfaction Methodology

The satisfaction rating is affected by the following:

- ▶ Customer satisfaction with end user-focused product attributes based on user reviews
- ▶ Popularity and statistical significance based on the number of reviews received by G2
- ▶ Quality of reviews received (reviews that are more thoroughly completed will be weighted more heavily)
- ▶ Age of reviews (more-recent reviews provide relevant and up-to-date information that is reflective of the current state of a product)
- ▶ Customers' satisfaction with administration-specific product attributes based on user reviews
- ▶ Overall customer satisfaction and Net Promoter Score® (NPS) based on ratings by G2 users

*The customer Satisfaction score is normalized for each Grid®, meaning the scores are relative.

Momentum Methodology

Each variable is normalized by category and aggregated to create a Momentum score. The inputs impacting G2's Momentum score are as follows:

- ▶ Employee growth, review growth, social growth, and web growth
- ▶ Year-over-year change

Categorization Methodology

Making G2 research relevant and easy for people to use as they evaluate and select business software products is one of our most important goals. In support of that goal, organizing products and software companies in a well-defined structure that makes capturing, evaluating, and displaying reviews and other research in an orderly manner is a critical part of the research process.

To manage the process of categorizing the software products and the related reviews in the G2 community, G2 follows a publicly available [categorization methodology](#). All products appearing on the Momentum Grid® for Distribution ERP have passed through G2's categorization methodology and meet G2's category standards.

Many terms that appear regularly across G2 and are used to aid in product categorization warrant a definition to facilitate buyer understanding. These terms may be included within reviews from the G2 community or in executive summaries for products included on the Grid®.

A [list of standard definitions](#) is available to G2 users to eliminate confusion and ease the buying process.

Momentum Grid® Methodology (continued)

Rating Changes and Dynamics

The ratings in this report are based on a snapshot of the user reviews and social data collected by G2 up through November 21, 2023. The ratings may change as the products are further developed, the sellers grow, and additional opinions are shared by users. G2 updates the ratings on its website in real time as additional data is received, and this report will be updated as significant data is received.

Trust

Keeping our ratings unbiased is our top priority. We require the use of a LinkedIn account to validate a G2 user's identity and employer. Additionally, we verify all reviews manually. We do not allow users to rate their employers' products or those of their employers' competitors. Though we share reviews from business partners (they often contain valuable content), we filter out business partner ratings in our aggregate ratings to avoid bias.

Our G2 staff does not add any subjective input to the ratings, which are determined algorithmically based on data aggregated from publicly available online sources and social networks. Sellers cannot influence their ratings by spending time or money with us. Only the opinion of real users and data from public sources factor into the ratings.

G2 may occasionally offer incentives for honest reviews to help us gather a full and accurate data set. These incentives are offered as thank-yous for approved reviews. Incentives are never conditioned upon the substance of the review, positive or negative. Each such incentivized review is disclosed with an "Incentivized Review" banner.
