

# ARTSYL

## Intelligent Process Automation

### Your Business Only Runs As Fast As Your Slowest Process

Now is the time to –

## *Accelerate* Your Business

### Artsyl fills the “Automation Gap”

There is a gap between document-based data and digital-based data for Enterprise Resource Planning. Artsyl’s Intelligent Process Automation Platform and ActionSolutions fills that gap.

“Using OCR and extracting data is one thing, doing so in the context of its use – is another. Truly productive automation comes from understanding the entire process and constantly learning from experience”. – Artur Vassilyev, CEO Artsyl Technologies

Designed for customization, and meeting unique process requirements of your business functions, the docAlpha AI Driven Digital Worker IPA platform eliminates manual work resulting in higher productivity, data accuracy and lower operational costs.

- ✓ Accelerates the availability of transactional data
- ✓ Acquires and classifies documents from multiple sources
- ✓ Adheres to YOUR process, standards & practices
- ✓ Finds, Extracts and Validates data using AI and Artsyl proprietary technologies
- ✓ Cloud – On-premise & Hybrid deployment options

Based on the docAlpha IPA Platform, Artsyl’s Financial ActionSolutions are preprogrammed with process and data extraction intelligence to accelerate deployments.
